

Quality Policy

CDI's management and employees are committed to continually exceeding customer's expectations and ensuring that quality is ingrained in every aspect of the business. We achieve this by:

- Considering the context of CDI and aligning the management system with the strategic direction;
- Complying with all applicable legal and other requirements, as identified in the legal register;
- Setting measurable objectives and targets for our quality performance, and regularly monitoring them;
- Establishing, applying, maintaining and continually improving our quality management system – in accordance with ISO 9001:2015;
- Working closely with our clients to meet their growing needs;
- Selecting suppliers that work to our high standards;
- Providing effective supervision to uphold rigorous quality assurance and quality control standards.

To continually improve and enhance customer satisfaction, we engage regularly with our clients, suppliers, employees, and subcontractors. Employees are supported with ongoing training and personal development to meet our business commitments.

This policy is reviewed annually to ensure it remains in-line with our strategic direction and responsibilities.

Garry Wright
Managing Director
